

Get up and running with OS MasterMap in Oracle – guaranteed – or your money back!

You can complete your migration to
OS MasterMap data in Oracle in
just days, not weeks.
No delays, no teams of
consultants, no fuss.

To take advantage of the GO Loader
guarantee, all you need is your OS
MasterMap data and an installed
Oracle Spatial or Locator database.

Typically a large local authority OS
MasterMap load can be completed
in less than two days, a smaller
authority can be up and running in
hours.

***With GO Loader you can spend your time
using your data, rather than managing it.***

NB. The GO Loader guarantee applies only to Standard Edition GO Loader – suitable for local authority use. National coverage requires Enterprise edition.

GO Loader is quick, easy and
proven for connecting
applications provided by:

- Autodesk
- CadCorp
- ESRI
- Intergraph
- Mapinfo
